

COLONOSCOPY PREPARATION 4L PegLyte

FOLLOW YOUR BOWEL PREPARATION CAREFULLY

Your colonoscopy has been booked for:		_at	
	DATE		TIME

5 DAYS BEFORE COLONOSCOPY

Avoid nuts, seeds, berries, raw fruits and vegetables, oatmeal, granola, multi or whole-grain products (e.g., bread, cereal, pasta, brown rice, wild rice). These foods take longer to digest and may remain in your colon on the procedure's day, affecting the bowel preparation quality.

An unsuccessful bowel preparation may result in a repeat procedure.

- + Hold fiber supplementation (e.g. Metamucil or Benefiber).
- + Hold iron supplementation and anti-inflammatory medications (e.g., *Advil, Motrin, Aleve*).

1 DAY BEFORE COLONOSCOPY

- + Eat a light breakfast before 8 am.
- → DO NOT only drink water to prevent dehydration.
- Drink a mixture of clear fluids until the procedure is completed.
- Clear fluids include pulp-free juices (like apple juice), coffee or tea (WITHOUT milk or milk substitute products), carbonated beverages (like 7UP, Sprite or Ginger Ale), Gatorade/Powerade or clear soup broth (no meat, noodles or vegetables).
- + <u>DO NOT</u> drink any red liquids.

WATER

JUICE

SODA

ENERGY DRINK

TEA

COFFEE

E SOUP/BROTH

In the morning

• Prepare the intestinal solution according to the instructions and place it in the refrigerator for later use.

Between 3:00 pm & 5:00 pm

- → Drink half the container of PegLyte (8 oz glass every 10-15 mins) until you finish drinking 2 liters.
- You can chill the PegLyte and rapidly drink it to make it more tolerable.
- Leave the remaining 2 liters in the fridge for later.

Between 8 pm & 10 pm

→ Drink the remaining PegLyte (8 oz glass every 10-15 mins until complete).

DAY OF COLONOSCOPY

- **DO NOT EAT**
- + 3 hours before your appointment time: you must stop drinking any fluids.
- + Do not take anything by mouth from this moment.

Your colon is empty when your stool color is clear to yellow:

IMPORTANT INFORMATION

- + Arrive at the hospital **1 hour** before your procedure with an updated list of your medication and allergies.
- + Register at the front desk.
- → Make arrangements beforehand to be driven back home by a responsible adult you know. Hospital policy does not allow a taxi ride back home.
- **★** <u>DO NOT</u> drive or operate machinery for 24 hours.
- + If you have any questions, please call 613-632-1111, ext. 51704.

See the following page for instructions on prescription medications.

PRESCRIPTION MEDICATIONS

You should always take your prescribed medications.

The only exceptions are:

Ozempic	Should not be taken for 7 days before your procedure	
Blood Thinners	 Stop taking Clopidogrel (<i>Plavix</i>) or Ticagrelor (<i>Brillinta</i>) 5 days before the procedure unless otherwise instructed by your physician. Stop taking Prasugrel (<i>Effient</i>) 7 days before the procedure unless otherwise instructed by your physician. Stop Apixaban (<i>Eliquis</i>), Rivaroxaban (<i>Xarelto</i>), Dabigatran (<i>Pradaxa</i>), Edoxaban (<i>Lixana</i>) 2 days before the procedure unless otherwise instructed by your physician. Stop warfarin (<i>Coumadin</i>) 5 days before the procedure unless otherwise instructed by your physician. *If you have a history of stroke, myocardial infarction, recent coronary stent placement or mechanical heart valve please follow your physician's instructions given during consultation. 	
Diabetic Medications	 If you take intermediate or long-acting insulin (e.g. Levemir, Lantus, Tresiba, Toujeo), only take half your usual dose the night before or morning of your procedure. DO NOT take short-acting insulin (e.g. Humalog, Apidra, NovoRapid, Humulin-R, Novolin-R) on the day of your procedure. DO NOT take diabetic pills on the day of your procedure (e.g. Metformin, Invokana, Januvia). Semaglutide (Ozempic, Wegovy, Rybelsus), Liraglutide (Saxenda, Victoza), Tirzepatide (Mounjaro), Dulaglutide (Trulicity) should NOT be taken for 7 days before your procedure. 	

Notes
